NOTTINGHAM

Host-IT operates a rapidly growing network of regional edge data centres which are highly secure and have great connectivity. Designed to meet the demands of modern businesses who need colocation services close to both their operations and their customer base.

All of our services come with full UK based support, transition and on-boarding with simple contracting to make sure your data operations keep running smoothly.

The Nottingham data centre delivers secure edge data hosting with a range of resilient connectivity options including the Host-IT fully managed service and is an ideal location for organisations based in the East Midlands.

The data centre is situated just 4 miles from Nottingham city centre with easy access to all the major motorways in the region as well as the rail network.

NOTTINGHAM

Nottingham is ideally located to support colocation services in the East Midlands region. With easy access to the M1, this is a first class facility with high levels of security.
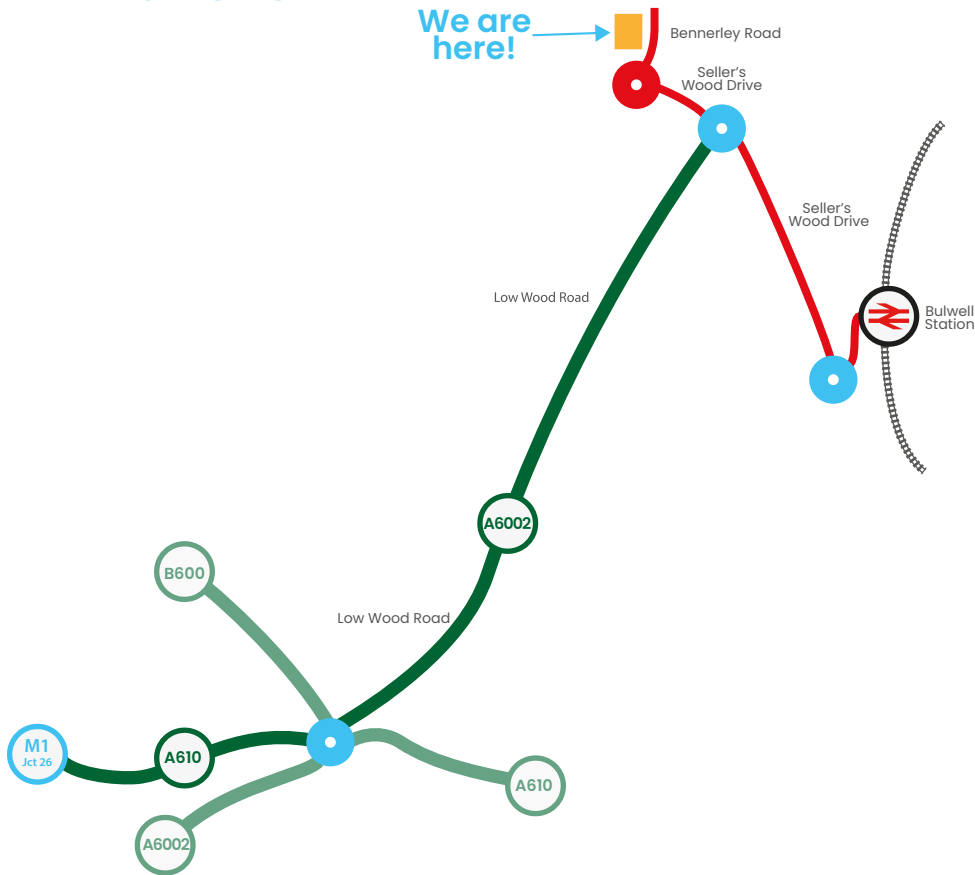

Profile

› Set in 3.3 acres of land the data centre is a 45,000 sq. ft building built to the highest standards.

› 6 data halls

› Meeting rooms, office space and kitchen facilities

› 24/7 access & on-site support.

Host-IT has over two decades of expertise in managing data centres and providing comprehensive connectivity solutions. Our offerings encompass a wide range of fully managed services, including advanced managed firewall protection where required, with bandwidth options spanning from 10MB to 100GB across highly reliable, redundant networks. We streamline our clients' experience by consolidating colocation, power, and connectivity charges into a single invoice, reducing administrative burdens. Moreover, our dedicated help desk is always ready to support all the services we offer, ensuring seamless operations for your business.

Services Available

Host-IT can supply the following range of services from this location:

Lockable ¼ , ½ & Full racks
